

ABSTRACT

MASSAGING APPARATUS IN CHAIR FORM

There is provided a massaging apparatus in chair form (1) designed to ensure storage of a footrest section (5) in a space below a seat section (3) to keep out of way of user's action to sit in or leave the seat section.

The massaging apparatus in chair form (1) includes a footrest advancing-retracting mechanism (10) for moving the footrest section (5) back and forth between a withdrawn position below the seat section (3) and a projected position forward of the withdrawn position.
