(54) Title: FOOD CONTAINERS

(57) Abstract: Disposable container (210) comprising an outer plastic or paper container (212) having at least one side wall (216), base (224) and an open top. The side wall is tapered such that the base is smaller than the open top. The outer container can hold a hot or cold second food being solid or liquid. An inner plastic container (214) is receivable in the outer container and closes the open top. The inner container has a tub (242) for receiving a first hot or cold food (206) such as ice cream nachos, pop corn, and candy, and a removable closure (282). The position of the tub is determined by the integral base diameter. There may be a gap between the inner and outer containers to allow a straw (292) to pass through a hole (294) in the closure (282) and into the second food (208) of the outer container.
