(54) Title: A SYSTEM USING A DRYWALL BOARD AND A JOINTING COMPOUND, COATING FOR WALL CONSTRUCTION

(57) Abstract: Coating and jointing material systems for wall construction are provided. The coating is applied to drywall elements prior to installation and is compatible with the jointing materials such that a substantially homogeneous surface may be obtained after the drywall elements are assembled with jointing material and the jointing material is dried. Further, a coating for wall construction is provided whereby a level 5 finish may be obtained without the need for a finishing coat or final skim coat. The coating formulation includes a noncellulosic thickener, a binder, a mineral filler and water. Methods for the construction of interior walls and interior construction systems are provided.
