

ABSTRACT

SPUIT-TYPE CONTAINER INCLUDING FLOCKING TIP HAVING TEMPORARY STORAGE

5

A sput-type container including a flocking tip having a temporary storage is provided. A lid is coupled to an upper portion of a container body, a pressing button is mounted at an inner upper portion of the lid, a sput bulb is
10 formed under the pressing button to discharge and suck a cosmetic material, a sput tube is coupled to a lower portion of the sput bulb, a coupling part of the flocking tip is formed at a lower end portion of the sput tube to be coupled to the flocking tip, a temporal storage is
15 formed in the flocking tip to temporarily store the cosmetic material, and the temporal storage is formed therein with a distribution hole. The pressing and then releasing operation of the pressing button by a user operate the sput bulb so that the sput tube sucks the
20 cosmetic material stored in the container body.
