(54) Title: ARGININE HETEROMERS FOR TOPICAL ADMINISTRATION

(57) Abstract: The invention is directed to a strategy for providing therapeutic or cosmetic benefit to skin by topically applying arginine chemically bound to a second (non-oligo arginine) compound in order to increase transepithelial delivery of arginine through a combination of increased solubility and flux across the skin. The arginine heteromers ofthe invention can add other complementary or beneficial properties for the skin beyond those that are arginine-related.
