(54) Title: METHODS AND APPARATUS FOR FACILITATING CREATION AND USE OF A SURVEY

(57) Abstract: A system, method, apparatus, means, and computer program code that allow a user or application to create a survey and/or survey template that may be provided to one or more recipients or other invitees. According to some embodiments of the present invention, a person or software application (103) desiring to create a survey can access a survey application or device (104) to create a survey. The survey application may have access to data created or maintained by one or more other applications (113) or systems such as, for example, information regarding people (e.g., names, contact information, roles) who might be invited to take, preview, approve, or otherwise access the survey and/or results of the survey. In some embodiments, other people, applications (110, 120), or systems may have access to some or all of the results of the survey. Also, in some embodiments, the survey application may store surveys and results from the surveys in a single table or other central location to facilitate and control access to and security of the surveys and results.
