(54) Title: INFORMATION TRANSMISSION METHOD AND TERMINAL

(54) 发明名称: 信息传输方法及终端

图 2

(57) Abstract: The present invention provides an information transmission method and a terminal. The method comprises: under a condition that resource overlapping occurs in a first channel state information (CSI) report and a second CSI report, performing the following operations: if a physical channel corresponding to the first CSI report is a physical uplink control channel (PUCCH), a physical channel corresponding to the second CSI report is the PUCCH, and a multi-CSI-PUCCH-resource list is configured, transmitting a CSI report in which resource overlapping occurs according to a resource in the multi-CSI-PUCCH-resource list; and/or, if the physical channel corresponding to the first CSI report is the PUCCH and the physical channel corresponding to the second CSI report is a physical uplink shared channel (PUSCH), and the PUCCH and the PUSCH are transmitted in different carriers, discarding the CSI reports carried by the PUCCH and the PUSCH, and transmitting the CSI reports carried by the PUSCH and the PUSCH.

201 Under a condition that resource overlapping occurs in a first channel state information (CSI) report and a second CSI report, perform the following operations: if a physical channel corresponding to the first CSI report is a physical uplink control channel (PUCCH), a physical channel corresponding to the second CSI report is the PUCCH, and a multi-CSI-PUCCH-resource list is configured, transmit a CSI report in which resource overlapping occurs according to a resource in the multi-CSI-PUCCH-resource list; and/or, if the physical channel corresponding to the first CSI report is the PUCCH and the physical channel corresponding to the second CSI report is a physical uplink shared channel (PUSCH), and the PUCCH and the PUSCH are transmitted in different carriers, discard the CSI reports carried by the PUCCH and the PUSCH, and transmit the CSI reports carried by the PUSCH and the PUSCH

本国际公布：

- 包括国际检索报告 (条约第21条(3))。

(57) 摘要：本公开提供一种信息传输方法及终端，包括：在第一信道状态信息CSI报告和第二CSI报告发生资源重叠的情况下，执行以下操作：若所述第一CSI报告对应的物理信道为物理上行控制信道PUCCH，所述第二CSI报告对应的物理信道为PUCCH，且配置有多CSI物理上行控制信道资源列表，则根据多CSI物理上行控制信道资源列表中的资源传输发生资源重叠的CSI报告；和/或，若所述第一CSI报告对应的物理信道为PUCCH和所述第二CSI报告对应的物理信道为物理上行共享信道PUSCH，且PUCCH和PUSCH在不同的载波上传输，则丢弃PUCCH和PUCCH承载的CSI报告，并传输PUSCH和PUSCH承载的CSI报告。
