(54) **Title:** MARITIME VESSEL STABILIZER

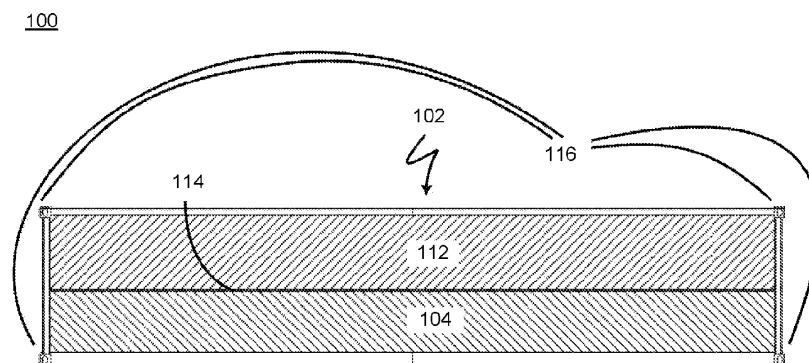

Fig. 1

(57) **Abstract:** A stabilization system for a maritime vessel including a stabilizer module. The stabilizer module includes a stabilizer housing and an extendable body. An extension feature couples the extendable body with the stabilizer housing. The extension feature is configured to allow movement of the extendable body between a first position adjacent to the stabilizer housing and a second position separated from the stabilizer housing below the maritime vessel. An actuator is provided for moving the extendable body between the first position and the second position.
