(54) Title: USER INTERFACE FOR DIFFERENT DISPLAYS

(57) Abstract: This invention relates to a method for adjusting a graphical user interface for at least two displays (130), (150), wherein due to an activation of at least one of at least two displays the graphical user interface is informed about the characteristics of said at least one activated display whereby the graphical user interface is refreshed according to said characteristics. This invention also relates to a display system, to a device, to a graphical user interface and to a computer program product.
