(54) **Title:** TAILORED ARRIVALS ALLOCATION SYSTEM TRAJECTORY PREDICTOR

FIG. 1

(57) **Abstract:** The different advantageous embodiments provide a system for generating trajectory predictions for a flight comprising a flight object manager and a trajectory predictor. The flight object manager is configured to generate flight information using a number of flight plans, a number of flight schedules, and flight status information. The trajectory predictor is configured to receive flight information from the flight object manager and use the flight information to generate the trajectory predictions.
