

METHOD AND SYSTEM FOR CLEANING A STORAGE TANK USING A PLURALITY OF DEVICES

ABSTRACT

5 The present disclosure relates to a method and a system for cleaning a storage tank using a plurality of devices. The method may comprise steps of positioning a first device at a first position of the storage tank; controlling the first device to move on a bottom and remove an impurity at the bottom; attaching a second device to a second position of the storage tank; controlling the second device to move on an
10 inner side wall and remove the impurity on the inner side wall; and controlling the first device to remove the impurity which has fallen onto the bottom caused by an operation that the second device removes the impurity on the inner side wall.
