(54) Title: MIXED PEROXYGEN ACTIVATOR COMPOSITIONS

(57) Abstract

The invention comprises heterocyclic cationic activators with the structure of Formula (I) that are capable of forming a peroxyimide acid with a source of active oxygen in aqueous solution or being in a peroxyimide form wherein A, R₁, R₂, R₃, Y, and Z are as defined in the disclosure. The activators of Formula (I) are admixed with another compound selected from anionic species either capable of forming a peracid with a source of active oxygen in aqueous solution, or being in a peracid form, or a non-ionic polarizable activator and suitable counterion.
