(54) Title: SALINE NOSE WIPE AND METHODS OF MANUFACTURE AND USE

Fig. 1

(57) Abstract: The present invention generally relates to a wet wipe or sheet that is suitable for contacting the skin and removing mucus from the skin. More specifically, the present invention relates to a wet wipe having an aqueous saline component suitable for dissolving and removing mucus in combination with the fabric matrix (20) of the wet wipe. Typically, the fabric matrix (20) of the wet wipe has a capacity of about 125 grams of solution per square meter, and it is impregnated with the aqueous saline solution to a level at or below approximately 80% of the absorbent capacity of the matrix (20).
