System Memory 134
Application Programs/Modules 160
Authorization Manager Module 202
Delegation Administration (DA) Module 204
Remote Client Web Site Administration Module 206
Execution Module (ExecutionMethod Method) 208
Authorized Process(es)/Command Line(s) (E.g., COM+, Etc.) 210
Other Program Modules 162
Program Data 164
IIS Metabase 212
Access Authorization Policy Store(s) 214
Delegation Administration (DA) Configuration File 218
(E.g., Method Definition(s), Parameter(s), Scope Mapping(s), Command Line Template(s), Log Data Format, Etc.)
Registry 220
Log File 224
Other Data 226
Authotization Manager API 216
API (E.g., API to Execute the Execution Module) 222
E.g., Hosted Web Site(s) and/ or Resourc(es), Web Server, Resource Configuration Module(s), Etc.
Authorization Manager UI Data, Access Control List(s), Delegation Administration Dynamic Link Library (DLL), Command Line to Create an Authorized Process 210, Helper Scripts, Etc.

Fig. 2

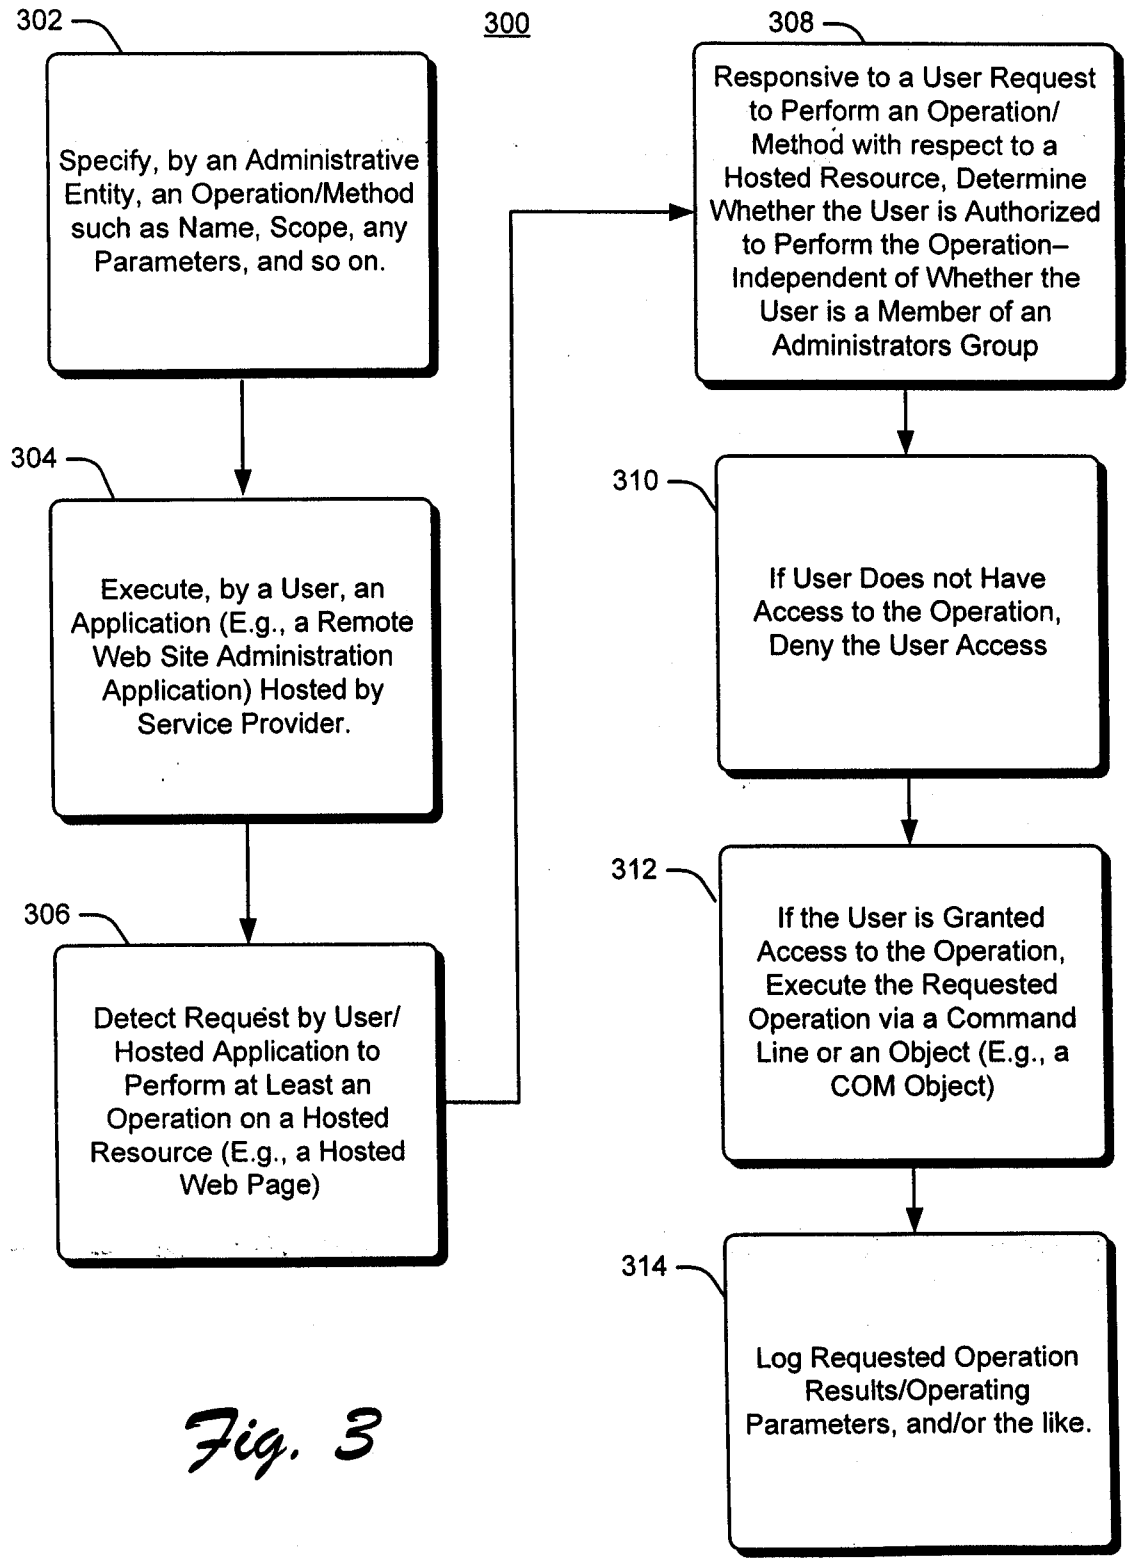

300
302
Specify, by an Administrative Entity, an Operation/Method such as Name, Scope, any Parameters, and so on.
304
Execute, by a User, an Application (E.g., a Remote Web Site Administration Application) Hosted by Service Provider.
306
Detect Request by User/ Hosted Application to Perform at Least an Operation on a Hosted Resource (E.g., a Hosted Web Page)
308
Responsive to a User Request to Perform an Operation/ Method with respect to a Hosted Resource, Determine Whether the User is Authorized to Perform the Operation– Independent of Whether the User is a Member of an Administrators Group
310
If User Does not Have Access to the Operation, Deny the User Access
312
If the User is Granted Access to the Operation, Execute the Requested Operation via a Command Line or an Object (E.g., a COM Object)
314
Log Requested Operation Results/Operating Parameters, and/or the like.
