(54) Title: SYSTEM AND METHOD FOR GENERATING A BILL OF QUANTITIES

(57) **Abstract:** A system and method for generating a bill of quantities associated with a construction project. The system comprises a first database for storing object oriented design data representing the construction project; a second database for storing a standard-based description associated with respective objects in the object oriented design data, the standard-based description identifying standardised object properties associated with corresponding construction objects in the construction project; and a generator for generating the bill of quantities based on the bill of qualities description library.
