CLAIMS

[Claim 1]

A beverage comprising a gel-like material and a liquid fraction, both the gel-like material and the liquid fraction containing gellan gum, and the gel-like material having a Brix value equal to or lower than the Brix value of the liquid fraction.

[Claim 2]

The beverage according to claim 1, wherein the ratio of the Brix value of the gel-like material to the Brix value of the liquid fraction is 0.2 to 1.

[Claim 3]

The beverage according to claim 1, wherein the concentration of the gellan gum contained in the gel-like material is 0.05 to 0.5 wt% relative to the total amount of the gel-like material.

[Claim 4]

The beverage according to claim 1, wherein the gellan gum concentration contained in the liquid fraction is 0.001 to 0.05 wt% relative to the total amount of the liquid fraction.

[Claim 5]

The beverage according to claim 1, which comprises 3 to 35 parts by weight of the gel-like material relative to 100 parts by weight of the liquid fraction.

[Claim 6]

A method for producing a beverage containing a gel-like material and a liquid fraction, the method comprising mixing the gel-like material containing gellan gum with the liquid fraction containing gellan gum, the gel-like material having a Brix value equal to or lower than the Brix value of the liquid fraction.

[Claim 7]

The method according to claim 6, wherein the ratio of the Brix value of the gel-like material to the Brix value of the liquid fraction is 0.2 to 1.

[Claim 8]

The method according to claim 6, wherein the concentration of the gellan gum contained in the gel-like material is 0.05 to 0.5 wt% relative to the total amount of the gel-like material.

[Claim 9]

The method according to claim 6, wherein the concentration of the gellan gum contained in the liquid fraction is 0.001 to 0.05 wt% relative to the total amount of the liquid fraction.

[Claim 10]

The method according to claim 6, wherein 3 to 35 parts by weight of the gel-like material is mixed relative to 100 parts by weight of the liquid fraction.

CLAIMS

[Claim 1]
A beverage comprising a gel-like material and a liquid fraction, both the gel-like material and the liquid fraction containing gellan gum, and wherein the ratio of the Brix value of the gel-like material to the Brix value of the liquid fraction (Gel Brix value/Liquid Brix value) is 0.4 to 0.85.

[Claim 2]
The beverage according to claim 1, wherein the concentration of the gellan gum contained in the gel-like material is 0.05 to 0.5 wt% relative to the total amount of the gel-like material.

[Claim 3]
The beverage according to claim 1 or 2, wherein the gellan gum concentration contained in the liquid fraction is 0.001 to 0.05 wt% relative to the total amount of the liquid fraction.

[Claim 4]
The beverage according to any of claims 1 to 3, which comprises 3 to 35 parts by weight of the gel-like material relative to 100 parts by weight of the liquid fraction.

[Claim 5]
The beverage according to any of claims 1 to 4, wherein the gelling agent contained in the liquid fraction and the gel-like material is only gellan gum.

[Claim 6]
A method for producing a beverage containing a gel-like material and a liquid fraction, the method comprising mixing the gel-like material containing gellan gum with the liquid fraction containing gellan gum, and wherein the ratio of the Brix value of the gel-like material to the Brix value of the liquid fraction (Gel Brix value/Liquid Brix value) is 0.4 to 0.85.

[Claim 7]
The method according to claim 6, wherein the concentration of the gellan gum contained in the gel-like material is 0.05 to 0.5 wt% relative to the total amount of the gel-like material.

[Claim 8]

The method according to claim 6 or 7, wherein the concentration of the gellan gum contained in the liquid fraction is 0.001 to 0.05 wt% relative to the total amount of the liquid fraction.

[Claim 9]

The method according to any of claims 6 to 8, wherein 3 to 35 parts by weight of the gel-like material is mixed relative to 100 parts by weight of the liquid fraction.

[Claim 10]

The method according to any of claims 6 to 9, wherein the gelling agent contained in the liquid fraction and the gel-like material is only gellan gum.
