(54) Title: ASSIGNING A MONEY SIGN TO A USER

Figure 1

(57) Abstract: A system (102) and a method (200) for assigning a money sign to a user. The system (102) receives a request to identify a money sign for a user. Further, the system (102) renders a set of questions. Furthermore, the system (102) receives a set of answers from the user. Subsequently, the system (102) extracts a key component from the set of answers received from the user. Further, the system (102) scores the key component for the set of answers based on a scoring matrix and deep learning algorithms. Subsequently, the system (102) compares a user score for each of the key component against a facet score for each of a set of predefined money signs. Further, the system (102) generates a match score for each of a set of predefined money signs. Finally, the system (102) assigns the money sign identified with a maximum match score to the user.
