ACTION

WO 01/60325 A1

(54) Title: PHARMACEUTICAL COMPOSITION

(57) Abstract: A composition comprising a pharmaceutical compound, a membrane-permeation enhancer, and a polymeric film-forming agent, including, for example, a hydrocarbon-based liquid nail lacquer comprising a solution of an anti-fungal agent in a pharmaceutically-effective amount, a membrane-compatible permeation enhancer in an amount effective to enhance penetration through a membrane or nail of said anti-fungal agent, a polymeric film-forming agent in an amount effective to form an adherent polymeric film on a membrane or nail, and a solvent for forming said solution; and a method for forming on a membrane or nail of the body an adherent film containing a pharmaceutical compound and permeation enhancer from a solution of the components in which there is used a mixture of solvents, including a solvent which is highly volatile and a solvent of lower volatility.
