# CLAIMS

[Claim 1]

A meat-like heated plant protein composition obtained by hydrolyzing a first plant protein to prepare a peptide; crosslinking the peptide to obtain a crosslinked peptide; mixing and heating the crosslinked peptide, sugar, cysteine and fat oil or fatty acid in advance; and then mixing and heating the resulting mixture with a second plant protein and fat or oil.

[Claim 2]

The meat-like heated plant protein composition according to claim 1 obtained by further mixing and heating methylcellulose and/or kanten or agar in the meat-like heated plant protein composition.

[Claim 3]

A dried ingredient obtained by further drying the meat-like heated plant protein composition according to claim 1 or 2.
