(54) Title: ADVANCE INDICATION OF RESOURCE SELECTION

800

802
transmitting an advanced indication to a second UE for an upcoming sidelink communication with the second UE over a sidelink communication link, wherein the upcoming sidelink communication is associated with one or more selected resources that include at least one resource falling outside the second UE's active time in Discontinuous Reception (DRX) configuration

FIG. 8

(57) Abstract: Communication apparatuses and methods for advance indication of resource selection in DRX configured sidelink (SL) communications are provided. The techniques disclosed here feature a method for wireless communication at a first user equipment (UE). The method comprises: transmitting an advanced indication to a second UE for an upcoming sidelink communication with the second UE over a sidelink communication link, wherein the upcoming sidelink communication is associated with one or more selected resources that include at least one resource falling outside the second UE's active time in Discontinuous Reception (DRX) configuration.
