

MEDICAL ADHESIVE TAPE

Abstract

A medical adhesive tape comprises a base fabric layer, a medicament layer and a release paper. The base fabric layer has a
5 pattern layer on the surface that contains a selected pattern or text
formed by printing, embroidering or embossing. The base fabric
layer may also be attached by a bonded layer on the surface that can
be bonded repeatedly. The bonded layer has a pattern layer on the
surface that contains a selected pattern or text formed by printing,
10 embroidering or embossing. The pattern or text aims to provide
identification effect.
