ABSTRACT OF THE DISCLOSURE

There is provided a working fluid and a refrigerating machine for preventing clogging in a depressurizing mechanism even with use of HFC-base refrigerants. A refrigeration circuit 1 is filled with a working fluid composed of an HFC-base refrigerant containing 50 wt% or more R32 and a mixed refrigerating machine oil. The mixed refrigerating machine oil is made up of a synthetic oil such as an ether oil and an ester oil and a PAG oil as a clogging preventive, and the PAG oil accounts for 1 to 15 wt% of the mixed refrigerating machine oil.
