(54) Title: SYSTEMS AND METHODS FOR ANIMATED FIGURE MEDIA PROJECTION

FIG. 1

(57) Abstract: A method of dynamic media generation for presentation via projection on an animated figure includes defining, via processing circuitry, a computer-generated model of the animated figure, operating, via the processing circuitry, a manufacturing system to generate a tangible model based on the computer-generated model, generating, via the processing circuitry, a revised computer-generated model based on the tangible model, simulating, via the processing circuitry, projection of imagery onto the revised computer-generated model, and operating, via the processing circuitry, a projector to project the imagery onto the tangible model based on simulated projection of the imagery onto the revised computer-generated model.
