(54) **Title:** INLINE RETRIEVABLE SYSTEM

FIG. 3

(57) **Abstract:** A system including an inline retrievable module, including a conduit configured to removably mount inline within a passage of a hydrocarbon extraction system, a first coupler having a first range of axial movement at a first end portion of the conduit, a second coupler having a second range of axial movement at a second end portion of the conduit, and an actuation system configured to actuate the first and second couplers to move along the respective first and second axial ranges of movement between coupled positions and uncoupled positions relative to the conduit.
