(54) Title: THIAZOLE-DERIVATIVES

(57) Abstract

Compounds of formula (I) as well as pharmaceutically usable salts and esters thereof, wherein R^1 , R^2 and R^3 have the significance given in claim 1, inhibit the binding of adhesive proteins to the surface of different types of cell and accordingly influence cell-cell and cell-matrix interactions. They can be used in the form of pharmaceutical preparations in the control or prevention of neoplasms, tumour metastasizing, tumour growth, osteoporosis, Paget's disease, diabetic retinopathy, macular degeneration, restenosis following vascular intervention, psoriasis, arthritis, fibrosis, kidney failure as well as infections caused by viruses, bacteria or fungi.
