(54) Title: METHOD AND APPARATUS FOR CONTROL AND PROCESSING OF VIDEO IMAGES

(57) Abstract: An apparatus and method for controlling and processing of video images. The apparatus comprising a frame grabber for processing image frames received from the image-acquiring device, an Entire-View synthesis device for creating an Entire-View image from the images received, a Specified-View synthesis device for preparing and displaying a selected view from the Entire-View image, and a selection of view-point-and-angle device for receiving user input and identifying a Specified-View selected by the user. The apparatus also comprising a user interface comprising a first sub-window displaying an Entire-View image, a second sub-window displaying an Specified-View image representing an image selected by the user from the total visual information available about the action scene to be displayed as the Specified-View image.
