(54) Title: METHODS FOR ENSURING RESUSPENSION OF PALIPERIDONE PALMITATE FORMULATIONS

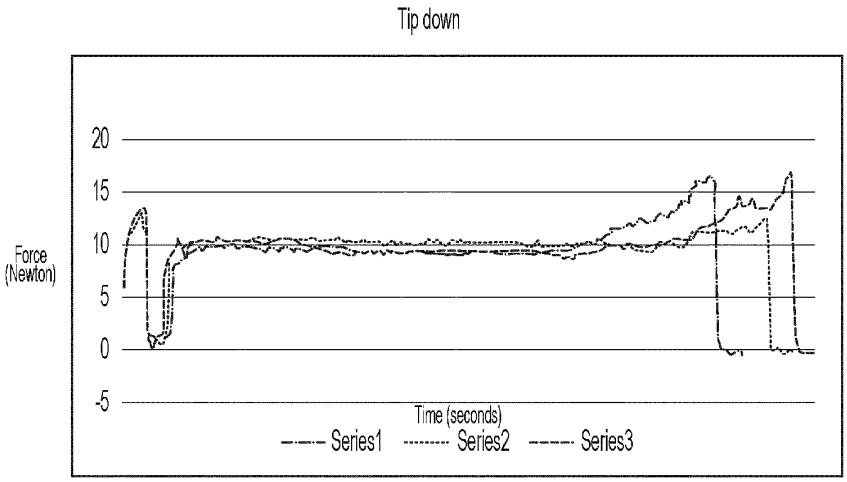

FIG. 1A

(57) Abstract: Provided are methods for improving resuspendability of a paliperidone palmitate extended-release injectable suspension within a syringe, for reducing a force required for injection of a paliperidone palmitate extended-release injectable suspension, or for reducing the likelihood of incomplete injection of a paliperidone palmitate extended-release injectable suspension comprising maintaining the syringe in a desired orientation during shipping of the syringe that varies from the orientation of the syringe during pre-shipping storage. Also provided are populations of syringes that respectively contain paliperidone palmitate extended release injectable suspension, wherein each of the syringes have been shipped to a destination, and the syringes were each maintained in a desired orientation during shipping of the syringe that varies from the orientation of the syringe during pre-shipping storage. The present disclosure also provides pharmaceutical products comprising a paliperidone palmitate extended-release injectable suspension within a syringe for
