

EXHAUST FAN INSTALLATION MEANS
ABSTRACT

A mounting assembly for mounting an exhaust fan in a prepared hole formed in a planar wall member or window glass pane having an inner clamp assembly arranged
5 to locate against the inside face of the glass pane adjacent the perimeter region of said hole and an outer clamp assembly adapted for sealing engagement against the outer surface of said glass pane around a perimeter region adjacent said hole and fasteners for fastening said inner and outer clamp assemblies together with said glass pane clamped between them. The outer clamp assembly is hinged so that it can pass
10 through the prepared hole and thereafter be returned to its normal circular shape.
