

Title of Invention: GLASSES, RECOMMENDED COSMETICS PRESENTATION
CONTROL SYSTEM, AND RECOMMENDED COSMETICS PRESENTATION
CONTROL METHOD

5

ABSTRACT

Glasses (10) are used to determine a color of each position of a face of a user by a computer system based on first image data (with-glasses face image) obtained by capturing an image of the user wearing the glasses, and second image data (no-glasses face image) obtained by capturing an image of the user without the glasses. The glasses
10 (10) include a position determination marker (13) at a predetermined position and has a predetermined color (color pattern (14)) at a predetermined position. The computer system determines the color of each position of the face of the user based on the first image data and the second image data using the marker (13) and the color.
