

LIQUID CRYSTAL POLYESTER RESIN BLEND

ABSTRACT

A liquid crystal polyester resin blend containing 100 parts by weight of a liquid crystal polyester resin composition and 0.01 to 20 parts by weight of a fluorinated resin which are blended in a solid state, wherein the liquid crystal polyester resin composition contains 100 parts by weight of a liquid crystal polyester and 0 to 150 parts by weight of a filler can give a stable plasticization during a molding process such as an injection molding process and an extrusion process, using an extruder having a screw, can be stably molded and gives a molded material having the excellent mechanical properties and excellent thermal resistance.
