(54) Title: TRACK SEGMENT FOR A SEGMENTED TRACK, VEHICLE HAVING SEGMENTED TRACKS, AND METHOD
OF USING THE SAME

FIG. 9

(57) Abstract: A track segment for a segmented track comprises a first track section and inner and outer couplers. A first connecting portion is disposed at one end of a body of the track section, defining a first inner section connector, a first outer section connector opposite from the first inner section connector, and a first engaging surface configured to abut on a second engaging surface of a second connecting portion of a second track section. The inner coupler has two inner coupler connectors configured to respectively connect to the first inner section connector of the first track section and to a second inner section connector of the second track section. An outer coupler has two outer coupler connectors configured to respectively connect to the first outer section connector of the first track section and to a second outer section connector of the second connecting portion of the second track section.
