

ABSTRACT

An absorbent article 1 includes an absorbent core 41. The absorbent core 41 has a protruded portion 42 protruding toward a backsheet 3 in its target section B. The protruded portion 42 is thicker than a first portion 41F and a second portion 41R of the absorbent core 41. In plan view, the protruded portion 42 has a widest part that is the widest in the lateral direction Y perpendicular to the longitudinal direction X of the absorbent core 41. The width of the widest part in the lateral direction Y is equal to that of the absorbent core 41.
