(54) Title: DEVICES, UPDATERS, METHODS FOR CONTROLLING A DEVICE, AND METHODS FOR CONTROLLING AN UPDATER

FIG 2

(57) Abstract: According to various embodiments, a device may be provided. The device may include a bootloader; a memory configured to store firmware data for controlling the device; a processor configured to operate in a device operation mode or in a bootloader mode; and an interface. The device operation mode may be a mode in which the processor controls the bootloader to load the firmware data stored, in the memory. The bootloader mode may be a mode in which the processor controls the bootloader to send an identifier of the device using the interface, to receive firmware data using the interface and to store the firmware data in the memory.
