(54) Title: PLANT-BASED CHEESE PRODUCT

Figure 15

(57) Abstract: A novel plant-based cheese product is provided comprising a plant prolamin combined with a fat, and a structural component in water, to yield a cheese product comprising a prolamin non-covalent network. The cheese product exhibits one or more characteristics such as stretchable in an amount of about 100% in a linear direction from a resting or baseline position without breaking at a temperature in the range of 40-80° C, and/or a melting profile that mimics cheese. A method of making the cheese product is also provided.
