(54) Title: SUBSTRATE NEST WITH DRIP REMOVER

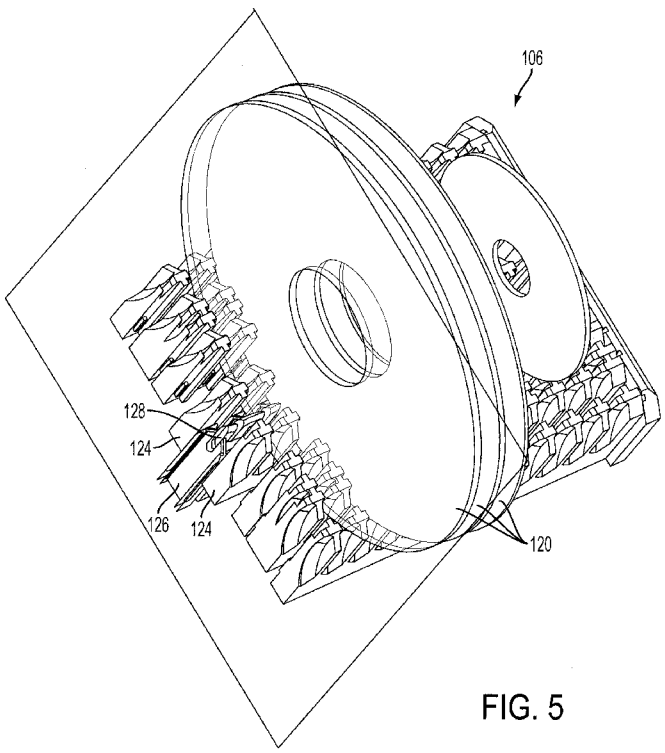

FIG. 5

(57) Abstract: An apparatus for supporting a work piece is provided. The apparatus includes outer support rails having support slots for supporting the work piece, the outer support rails disposed on opposing sides of the apparatus between opposing end members of the apparatus. Inner support rails extend between the opposing end members of the apparatus. An inner surface of each of the inner support rails has vertically disposed extensions extending therefrom. The vertically disposed extensions are aligned in pairs along a length of the inner support rails. A moveable device is disposed between the pairs of vertically disposed extensions. The moveable device is buoyantly moveable so that as the work piece is lifted, the moveable device follows. A method for cleaning a work piece is also included.
