PHARMACEUTICAL COMPOSITIONS AND COMBINATIONS FOR THE TREATMENT OR PROPHYLAXIS OF DISORDERS RELATED TO HIV AND RETROVIRUS

Abstract of Invention

The subject invention is directed to a pharmaceutical composition for the treatment or prophylaxis of disorders related to HIV and retrovirus, said composition comprising an effective amount of a compound of formula I

wherein

Ar represents aryl, which is unsubstituted or substituted with halo, hydroxyl or C_{1-6}-alkoxyl;

A represents C_{1-6}-alkylene, C_{2-6}-alkenylene or C_{2-6}-alkynylene;

m is an integer from 0 to 6; and

B represents hydrogen, C_{1-6}-alkyl or aryl, said aryl is unsubstituted or substituted with halo, hydroxyl, C_{1-6}-alkyl, C_{2-6}-alkenyl or C_{2-6}-alkynyl;

or pharmaceutically acceptable salts thereof, together with a pharmaceutically acceptable carrier.

The invention is also directed to a pharmaceutical composition for use in the inhibition of HIV and retrovirus replication comprising an effective amount of a compound of formula I.

The invention is further directed to a combination of compound of formula I and other antiviral agents.
