

PICTURE ANNOTATION METHOD, APPARATUS, PROCESSING DEVICE, AND SYSTEM

ABSTRACT

5 A picture annotation method, apparatus, processing device, and system are provided in the
present specification. Annotation to multiple continuous pictures is converted into video
annotation. After multiple pictures to be annotated are converted into a video, video annotation is
performed on a video image. The picture annotation is converted to video annotation, and an
annotation result can be quickly obtained based on a video frame. Finally, a video result is mapped
10 to original pictures to obtain annotation results of the original group of pictures.
