

STABILIZED DESMOPRESSIN

Abstract

The invention is related to a pharmaceutical composition comprising an active ingredient and a stabilizing agent, wherein the active ingredient is desmopressin or a pharmaceutical acceptable salt thereof, and wherein the stabilizing agent is at least one gum, the use of one or more gums to increase the stability of a pharmaceutical composition comprising desmopressin or a pharmaceutical acceptable salt thereof as an active ingredient against denaturation, a method for preparing an orally disintegrating film comprising desmopressin or a pharmaceutically acceptable salt thereof as well as an orally disintegrating film obtainable thereby.
