ABSTRACT

The present invention relates to use of a compound for the manufacture of a medicine for the treatment and/or prevention of a disease or a syndrome caused by the aggravation of sepsis. The present invention is applicable to prevention or therapy for diseases such as sepsis, severe sepsis, septic shock, and multiple organ dysfunction syndrome. More particularly, the present invention is useful for an emergency medical service, for treatment of injury caused by a traffic accident, burns, heat attacks, or severe infective diseases.
