(54) Title: DEVICES AND METHODS OF COMMUNICATION

FIG. 2

(57) Abstract: Various aspects of the present disclosure relate to devices and methods of communication. A first device may receive a set of messages for paging the first device from a set of second devices. If a subset of messages in the set of messages fulfils a condition, the first device may respond to the subset of messages. Upon reception of a response to the message for paging the first device, a second device may transmit information of the first device to a third device. In this way, a paging for an A-IoT device may be carried out in an efficient way and management of the paging may be optimized.
