Title of Invention: METHOD FOR FESTOONING A POWER CABLE

ABSTRACT

The present disclosure relates to a method for festooning a power cable (1) while deploying it in a deployment site comprising a rail (2) having a start and an end, the method comprising the steps of:

- providing the cable (1) with a plurality of cable holders (3) slidably movable along the rail (1), each two consecutive holders (3^{I}, 3^{II}) being spaced at a holder predetermined distance on the cable (1);
- providing a festooning apparatus (7) after the start of the rail (2), the festooning apparatus (7) comprising a lowering device (8) movable between a raised position and a lowered position;
- deploying the cable along the rail (2).
