(54) Title: SYSTEM AND METHOD FOR RECEIVING AND SYNCHRONIZING CONTENT ON A COMMUNICATION DEVICE

Fig. 2

(57) Abstract: A system and method for receiving and synchronizing content on a communication device comprising a source configured to provide a first content to the communication device via a first channel; a host of the communication device configured to push a second content to the communication device via a second channel, the second channel separate and independent from the first channel; wherein in operation, the first content and second content are synchronized at the communication device via a presentation layer of the communication device is disclosed. The system and method are particularly advantageous to provide a seamless experience to the a user.
