

说明书摘要

5 本说明书提供的订单处理方法、电子设备、订单管理系统及存储介质。订单处理方法应用于订单管理系统，订单管理系统包括服务设备和多个 POS 设备。其中，第一 POS 设备可以响应于操作者的下单操作生成目标订单并存储，第一 POS 设备为多个 POS 设备中的任意一个。第一 POS 设备可以将目标订单发送服务设备。服务设备在接收到目标订单后主动将目标订单同步给至少一个目标 POS 设备。至少一个目标 POS 设备可以
10 存储目标订单，并对目标订单进行管理，至少一个目标 POS 设备为多个 POS 设备中除第一 POS 设备之外的部分或全部。

This specification provides an order processing method, an electronic device, an order management system, and a storage medium. The order processing method is applied to the order management system, and the order management system includes a service device and a
15 plurality of POS device. A first POS device can generate a target order in response to an order placing operation of an operator, and store the target order. The first POS device is any one of the plurality of POS devices. The first POS device can send the target order to the service device. After receiving the target order, the service device actively synchronizes the target order to at least one target POS device. The at least one target POS device can store the target
20 order, and manage the target order. The at least one target POS device is some or all of the plurality of POS devices other than the first POS device.
