

ABSTRACT

This application discloses a method and apparatus for displaying a picture of a virtual environment, a device, and a medium, and relates to the field of virtual environments. The method includes: displaying a second virtual environment picture, the second virtual environment picture being a picture obtained by observing the virtual environment by using a second observation position as the observation center, the second virtual environment picture displaying the master virtual character at a second position and a target virtual character at a third position, and the second observation position being determined according to the second position; and displaying a third virtual environment picture in response to the second virtual environment picture displaying the target virtual character, the third virtual environment picture being a picture obtained by observing the virtual environment by using a third observation position as the observation center, the third virtual environment picture displaying the master virtual character at the second position and the target virtual character at the third position, and the third observation position being determined according to the second position and the third position. The method may display a virtual character more completely on a virtual environment picture.
