(54) Title: **READY-MADE DISH DISPOSABLE PACKAGING, EQUIPPED OF VENT DEVICE FOR INNER VAPORS**

(57) **Abstract:** Ready made dish disposable packaging comprising a container (1) which defines a first compartment (2) and at least one second compartment (3). The container (1) can have a bowl form and is closed in its upper part by a superior sealing film (21) which is also an integral and substantial part of a vent device of inner vapours. The second compartment (3) is, on the contrary, closed by means of a sliding sealing system comprising a plug (14). In the closure position of the plug (14), it is impossible that the component contained in the second compartment (3) enters in contact with the component contained in the first compartment (2), while in the opening position of the plug (14), the component contained in the second compartment (3) can spill out through the lateral openings of the plug (14).
