(54) Title: CONTROL SYSTEM

FIG. 2

(57) Abstract: A control system includes an air conditioning device (21) and a controller (12). The controller (12) includes a time determination unit (122), a number-of-persons estimation unit (123), a determination unit (124), and an operation control unit (125). The time determination unit (122) determines a time lag. The number-of-persons estimation unit (123) estimates the number of persons in a region at a time when the time lag has elapsed. The determination unit (124) determines whether to activate the air conditioning device (21) on the basis of the number of persons estimated by the number-of-persons estimation unit (123).
