ACTION

WO 02/078580 A1

(54) Title: CONDOM WITH AN ERECTOGENIC COMPOSITION

(57) Abstract: A condom has an erectogenic compound immobilised on the interior surface and substantially at the head end thereof. The compound may be applied as a component of a composition comprising the erectogenic compound dispersed or dissolved in a gel carrier comprising a liquid medium including a thickening agent. The condom may include a lubricant which may be immiscible with the erectogenic compound or composition. Use of the condom sustains a penile erection following spontaneous initiation thereof, to prevent slippage of the condom off the penis while intercourse takes place.
