

SPINNING REEL

ABSTRACT OF THE DISCLOSURE

5 A worm shaft disposed on an upper side of a master gear shaft. A spool shaft
disposed on an opposite lower side of the master gear shaft. An engaging member
arranged to engage a spiral groove in worm shaft is also disposed on the upper side of the
master gear shaft. A slider body includes a first mounting portion disposed on the
opposite lower side of the master gear shaft and is a portion to which the spool shaft is
10 fixed, a second mounting portion that is disposed on the upper side of the master gear shaft
and is a portion to which the engaging member is engaged, and a coupling portion for
coupling the first mounting portion and the second mounting portion so that the master
gear shaft is straddled by the first mounting portion and the second mounting portion
when the spool shaft is disposed most forward.
