

ABSTRACT

The present invention aims to provide a method for purifying *cis*-5-hydroxy-2-piperidinecarboxylic acid with high purity, and a method for producing its
5 derivative. The present invention provides a method for producing a *cis*-5-hydroxy-2-piperidinecarboxylic acid derivative, which method comprises a step of converting *cis*-5-hydroxy-2-piperidinecarboxylic acid into a compound(s) of Formula (1) and/or Formula (2) (wherein R¹ represents a protective group for an amino group, and R² represents a C₁-C₆ alkyl group), and a method for purifying *cis*-5-hydroxy-2-
10 piperidinecarboxylic acid.
