

DATA PROCESSING METHOD, APPARATUS, AND SYSTEM

ABSTRACT

Embodiments of the present invention provide a data management technology.

- 5 An OSD receives a strip write request sent by a client server, where the strip write request carries a to-be-written strip, a version number of the to-be-written strip, an offset of the to-be-written strip, and an object ID of the to-be-written strip; and the OSD writes the to-be-written strip into a storage location determined by using the object ID, the version number of the to-be-written strip, and the offset of the
- 10 to-be-written strip. By applying the present invention, a quantity of object IDs can be reduced.
